filebackup

backup1.c (使用 C 库函数实现文件备份):

```
gcc backup1.c -o backup1
./backup1
```

backup2.c (使用系统调用函数实现文件备份):

```
gcc backup2.c -o backup2
./backup2
```

filesystem

(简单文件系统的模拟)

```
gcc filesystem.c -o filesystem
./filesystem
```

实验报告中指令如下:

```
1
user1
123456
user1
123456
create a 1000 rw
create b 1000 r
write a
666
close a
cat a
666
close a
chmod a r
fine a
ren a c
dir user1
rm c
dir user1
df
```
